

APICS Certified Supply Chain Professional

Achieve Competitive Success with the APICS CSCP Program

The APICS Certified Supply Chain Professional (CSCP) program is the most widely recognized educational program designed for operations and supply chain management professionals. Demonstrate your mastery of supply chain management best practices by obtaining your APICS CSCP designation.

The Hamilton Chapter of APICS, The Association for Operations Management, is offering the APICS CSCP Preparation Course that will expand your supply chain knowledge and help you prepare for the APICS Certified Supply Chain Professional certification exam.

Who can benefit from the program?

The APICS CSCP program is ideal if you are

- Responsible for supply chain activities within your organization
- Interested in increasing your knowledge and expertise in the field of supply chain management
- Looking to advance your career through certification or professional development
- An employer or manager wanting to create a common standard of competency across your organization
- A professional who is consulting or teaching supply chain functions
- A CPIM needing certification maintenance points.

"Enrolling in the instructor-led CSCP exam preparation course turned out to be the best decision I could have possibly made. The instructors have expert knowledge of the material and practical application experience they willingly share. The classes are well paced, interesting and highly effective knowledge transfer sessions. Although the training materials are well structured and provide comprehensive coverage of the supply chain management body of knowledge, it was the in-class instruction and interactions that made the concepts real and memorable for me".

- Keith Jawahir Ph.D., P.Eng., CSCP

About the Instructors

Pam Somers, CPIM, CIRM, CSCP, and Eric Somers, CPIM, CIRM, CSCP, have more than 45 years of combined practical and training experience in supply chain and operations management, including many years in the aerospace and defense industry. Together, they have helped more than 150 individuals prepare for their CSCP certification exams since 2008.

The Somers' careers have included positions in quality assurance, operations management, and business systems implementation. Their experience includes both operational and management roles, as well as project and consulting assignments, as employees and as client trainers, consultants, and project managers for providers of fully integrated enterprise solutions.

Pam and Eric work together as educators, trainers and consultants, offering progressive operations and supply chain strategies, including systems implementation, JIT/lean, total quality management, and sales and operations planning, with a particular focus on managing change.

As active APICS volunteers and trainers, Pam and Eric have taught many students in various programs, including Instructor Development, the Fundamentals of Materials and Operations Management, and the APICS certification programs. They have developed and delivered numerous presentations and workshops on both technical and soft-skill topics.

The APICS CSCP Program is accredited by the Canadian Supply Chain Sector Council through the National Accreditation Program (NAP).

For more information about the NAP, visit <http://www.supplychaincanada.org/en/NAP>

Registration
